View the Destination Details

Procedure

- 1 Navigate to **Reporting > Additional Reports > Top Destinations** and click a domain to explore.

Destination	Views	Bytes	Percentage
www.google.com	1,234,567	123,456,789	12.34%
www.facebook.com	987,654	98,765,432	9.87%
www.amazon.com	876,543	87,654,321	8.76%
www.twitter.com	765,432	76,543,210	7.65%
www.linkedin.com	654,321	65,432,109	6.54%

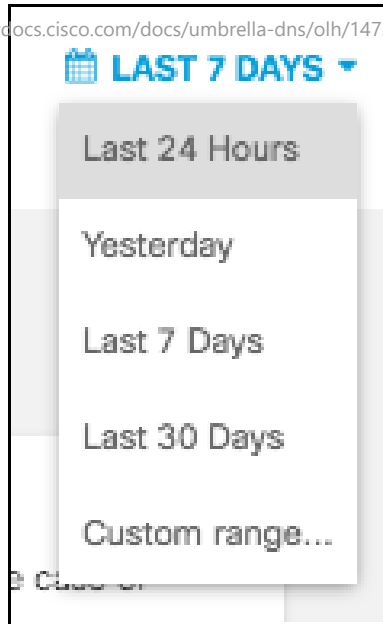

You can also search for a destination in the Top Destinations Report. When you search for a destination, Umbrella returns any related domains and subdomains.

FILTERS

- 2 Choose a time frame to view the Destination Details.

Like other Umbrella reports, the Destination Details can be filtered by time: the last 24 hours, the previous calendar day (yesterday), the last seven days, the last month, or a custom range within the last 30 days.

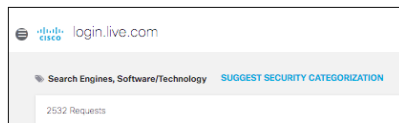

Source: <https://securitydocs.cisco.com/docs/umbrella-dns/olh/147386.dita>

- 3 View the destination's content and security categories.

At the top of the report, under the domain for the destination you are viewing, are any categories associated with the destination. For category definitions, see

[Content Category Definitions](#) and [Security Categories](#).

If you believe this destination belongs in a [security category](#), click **Suggest Security Categorization** and fill out the request which creates an internal Umbrella ticket for a security researcher to review. Then, click **Send**.

Request Security Reclassification

www.displaycontentnetwork.com is not currently in a security category.

Something not right? Let us know why this destination should be reclassified below.

Why should www.displaycontentnetwork.com be reclassified?
